Subject Index

(D^0X) exciton complex 77

2-magnon Raman scattering 19

ABO_3 crystals 411
Aggregates 229
Amorphous solids 417
Antenna system 247
Assemblies of molecular aggregates 291
Avalanche 405

Bound excitons 77
Bragg reflector 7

CARS 43
Cell proliferation 271
Charge transfer vibronic exciton 91, 109
Charge-transfer exciton 19
Chick embryo 271
Chromium 423
Cis-trans isomerization 313
Coherence in two-photon absorption 167
Coherence length 229
Coherent and incoherent ion–ion interaction 361
Coherent control 155
Coherent light–exciton interaction 77
Coherent optical transients 325
Coherent spectroscopy 1
Coherent transients 97
Color center 457
Color center distribution 493
Composition variation 411
Confocal microscopy 493
Correlation function 147
Cross relaxation 55
Crystal defects 351
CSRS 43

Defects 423, 435, 447
Delocalization 399
Delocalization length 115
Diluted magnetic semiconductor 83
Disorder 291
Disordered solids 61, 131
Doped insulators 335
Dynamic processes in nanostructure 241
Dynamical disorder 265

Electrolytical coloring 457
Electron transfer 235
Electronic correlations 1
Electronic "bubble" 135
Electron–phonon interaction 139
Energy relaxation 317
Energy transfer 177, 193, 199, 215
Eu^{3+} site distortion 343
EXAFS 205
Excitation spectra 43
Exciton and electron migration 357
Exciton density matrix 105
Exciton localization 283
Exciton transfer and relaxation 105
Excitonic magnetic polaron 83
Exciton–exciton annihilation 265
Exciton–phonon condensation 69
Excitons 7, 69, 115, 229, 309

Femtosecond 13
Femtosecond pump–probe spectroscopy 49
Ferroelectric phase transition 91, 109
Fictitious forces 317
Fluorescence 193, 251, 271
Four-wave mixing 155
Free-electron laser experiments 183
Frenkel excitons 61, 131, 247
Frequency-resolved optical transients 7
Fullerene complex 241

Glass 393
Glasses 177, 417

Hole burning 357, 385, 393
Homogeneous line width 417

Homogeneous linewidth 393
Hot electron relaxation 49
Hot electrons 33

In situ studies 205
Insulator 461
Inversion symmetry 335

J-aggregates 115, 265
Jahn–Teller effect 385

Lifetimes 297
Line shape 221
Line width distributions 255
Long-range interactions 351
Long-term intramolecular energy storage 313
Luminescence decay 321

Matrix isolation 29
Maxwell–Bloch equations 379
Maxwell–Schrödinger equation 121
Micro photoluminescence 321
Microcavity 275
Mott transition 461
Multiphonon 171

Nanocrystals 97, 297, 317, 393
Nanoparticles 139, 209, 317
Nanostructure 199
Natural line width 255
Non-fluorescent molecule 261
Non-Markovian dynamics 155
Non-Markovian phase relaxation 97
Non-radiative relaxation 209
Nonequilibrium phonons 161
Nonlinear processes 55
Nonlinear spectroscopy 241

One dimension 193
Optical bistability 291
Optical centers 361
Optical dephasing 351
Optical processing 325
Optical properties 367
Optical response 37
Optical spectra 61, 131
Optical Stark effect 1

Pairs 435
Perovskites 91, 109
Phonon scattering 69
Phonon-assisted luminescence 283
Phosphors 465
Photo-induced ESR 205
Photochemical conversion 447
Photoconductivity 399, 461
Photoionization spectral hole-burning 335
Photoluminescence 37, 187, 301, 481
Photon avalanche 55
Photon echo 325
Photon interaction 305
Photon-gated hole burning 373, 389
Photostimulated luminescence 465
Photostructural changes 205
PLZT ceramics 215
PMMA 389
Polaron 147
Porous silicon 37
Primary photosynthetic events 357
Propagation in anisotropic media 379
Pump–probe spectroscopy 115
Pump–probe spectrum 265
Purple bacteria 247

Quantum beats 97
Quantum confinement 187
Quantum dots 301, 305, 321
Quantum structure 283
Quantum wells 7, 309

Radius 147
Raman scattering 187, 205, 481
Rare earth 373, 389, 429
Rare earth activated insulators 399
Rare earth ions 171, 275
Reaction center of photosystem II 357
Redfield equations 105
Reduced density matrix 235
Resonance modes 429
Resonance splitting 361
Rydberg states 135

SBN 367
Scanning molecular exciton microscopy (SMEM) 121
Scanning near field optical microscopy (SNOM) 121
Scattering 229
Second-harmonic generation 411
Selective excitation 343
Self trapping 147
Self-induced transparency 77, 379
Self-trapped exciton 13
Sideband 171
Silicon nanocrystals 187
Single excitons 305
Single molecule spectroscopy 255

Single-molecule detection 261
Single-molecule spectroscopy 221
Si–H vibrations 183
Site-selective spectroscopy 361, 487
Soft mode coupling 177
Solid state lasers 477
Solitons 379
Sol–gel glass 447
Sol–gel method 215
Sol–gel silica 199
Sol–gel technology 393
Solvent fluctuations 43
Spatially resolved refractive index profiles 411
Spectral diffusion 127, 221
Spectral hole burning 343
Spectroscopy of disordered systems 477
Spontaneous emission control 275
Stimulated photon echo 127
Stoichiometry 423
Strongly correlated electrons 19
Sulfides 373, 389
Superexchange 235
Superradiance 309

Thermal lens microscope (TLM) 261
Thermal quenching 453
Thermal surface displacement 33
Thermochemical reduction 481
Thermoluminescence 453
Thin films 367
Transient grating 127
Transmission 457
Transport phenomena 33
Trapping centers 465
Tumor 251
Two-photon absorption 7, 167

Ultrafast dynamics 135
Ultrafast energy relaxation 29
Ultrafast holography 325
Up-conversion 405, 471, 487

Vibronic transitions 429

Wave mixing 37
Wavepacket 13

Xerogel 199

YSGG 471

Zero-phonon lines 351

Materials Index

Amorphous chalcogenides 205
Amorphous silicon 183
Azo-dendrimer 313

CdS 77
CdSe/ZnSe 305
Ce^{3+} 461
Cr 435
Cr^{3+} 441, 461
Cr^{5+} 215
Cu_2O 69

Diamond 493

Er 471
Er^{3+} ions 487
Eu^{2+} 385
Eu^{3+} 215, 367
$Eu^{3+}:Y_2O_3$ 297

Fullerenes 29, 241

γ-Al_2O_3 209
GaAs nanocrystals 301
Gold film 33

InGaAs 49

KCl 457

La_2CuO_4 19
$LaCl_3$ 55
$LiNbO_3$ 423, 435
$LiNbO_3$ waveguides 487
Lithium niobate 441

Nanocrystalline silicon 161

Os^{4+} 405

Praseodymium 55
Protoporphyrin IX 251
Protoporphyrin IX metabolism 271

Re^{4+} 405

Silicon 283
Si–SiO_2 film 187
Solid hydrogen 135
Sol–gel alumina 209
$SrAl_2O_4:Eu^{2+},Dy^{3+}$ 465
SrF_2 385
SrS:Cu 453

$Y_2O_3:Eu^{3+}$ 139
